

Security Policy

Our company is dedicated to protecting your online security. We apply safeguards in order to maintain the physical, electronic, and procedural integrity of your data by using a secure Web server that allows Web browser programs (e.g., Netscape or Microsoft Internet Explorer) to interact with it through an encrypted session. We employ a Secure Socket Layer (SSL) connection that provides an encrypted connection between your computer(s) and Web servers. The 256-bit encrypted connection scrambles ordinary text or data into cipher text to safeguard sensitive information during its journey across the Internet. The information is decrypted, or put back into a readable format, when it reaches its intended destination. We are devoted to ensuring you know which data is being collected on our website, and we can address any privacy concerns you may have. Any data obtained and your choices regarding the collection and use of your data are detailed in this privacy policy.

Privacy Policy

When visiting IdentityProtection-Services Web server will collect and store the following information:

- The name of the domain from which you access the Internet
- The date and time you access this site
- The Internet address of the Web site from which you linked directly to this site
- This information is used for security and to measure the number of users to this site

We will not share or sell your personal data to unaffiliated third parties. Access to non-public data is restricted to employees that need to know identifying information in order to provide our products and services. In addition, your personal data will also be maintained in our customer records for billing and contact purposes.

Privacy Policy Changes

Our company reserves the right to change this privacy policy at any time. All active customers will be notified in advance of any such changes via e-mail.
